JOURNAL OF AEROSOL SCIENCE

In association with the Gesellschaft für Aerosolforschung (GAeF)
Association for Aerosol Research

Founding Editor Prof. C. N. DAVIES (1970–1984)

Editorial Board

Dr. D. HOCHRAINER, *Editor-in-Chief, Fraunhofer-Institut, D-5948 Schmallenberg, W. Germany*
Dr. M. M. BENARIE, *Associate Editor, Environmental Consultant, 12, rue de l'Yveline, 91220, Bretigny, France*
Prof. V. PRODI, *Associate Editor, Dipartimento di Fisica, Universita degli Studi di Bologna, Via Irnerio 46, I-40126, Bologna, Italy*
Prof. K. R. AKSELSSON, *Department of the Working Environment, Lund University Institute of Science and Technology, Box 118, S-22100, Lund, Sweden*
Dr. M. ANISIMOV, *Institute of Coal of SB AS USSR, Sovetsky Prospect 18, 650099 Kemerovo, U.S.S.R.*
Prof. J. BRICARD, *Professeur à la Faculté des Sciences de Paris, 9 bis, Rue de Moscou, F-75008, Paris, France*
Prof. Dr. H. FISSAN, *Universität Duisburg, Bismarckstrasse 81, D-4100 Duisburg, W. Germany*
Dr. J. GEBHART, *Gesellschaft für Strahlen- und Umweltforschung, Paul-Ehrlich-Str. 20, D-6000 Frankfurt/Main, W. Germany*
Prof. W. C. HINDS, *Environmental and Occupational Health Sciences, School of Public Health, University of California, Los Angeles, CA 90024, U.S.A.*
Dr. D. B. INGHAM, *School of Mathematics, University of Leeds, Leeds LS2 9JT, U.K.*
Dr. G. KASPER, *Liquid Air Corporation, Technology Center, 5230 S. East Avenue, Countryside, IL 60525, U.S.A.*
Prof. Y. KOUSAKA, *Department of Chemical Engineering, College of Engineering, University of Osaka Prefecture, Mozu-Umemachi, Sakai, Osaka 591, Japan*
Dr. J. P. LODGE, Jr., 385 *Broadway, Boulder, CO 80303, U.S.A.*
Prof. J. MEGAW, *Department of Physics, York University, 4700 Keele Street, Downsview, Toronto M3J 1P3, Canada*
Dr. U. C. MISHRA, *Head, Pollution Monitoring Section, Bhabha Atomic Research Centre, Bombay 400 085, India*
Dr. JOSEF PICH, *J. Heyrovski Institute of Physical and Electrochemistry, 11000 Prague-1-Opletalova 25, Czechoslovakia*
Dr. J. H. VINCENT, *Institute of Occupational Medicine, Roxburgh Place, Edinburgh EH8 9SU, U.K.*
Dr. A. SCHMIDT-OTT, *Solid State Physics Laboratory (HPF), ETH-Hönggerberg, CH-8093 Zürich, Switzerland*

GAeF Executive Board

Prof. Dr. O. PREINING, *President (Vienna, Austria)*
Prof. W. SCHIKARSKI, *Vice-President (Karlsruhe, W. Germany)*

The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance of $3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970.

Permission for other use. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

The Item-fee Code for this publication is: 0021-8502/88 $3.00 + 0.00

Microform Subscriptions and Back Issues. Back issues of all previously published volumes are available direct from Pergamon Press. Back issues of Pergamon journals in microform can be obtained from: UMI, 300 North Zeeb Road, Ann Arbor, MI 48106, U.S.A.

CONTENTS

NUMBER 1

A. RENOUX	1	Troisièmes Journees d'Etude sur les Aérosols COFERA
M. BARBE-LE-BORGNE, D. BOULAUD, C. MALHERBE, A. RENOUX et A. BOUTIER	3	Etude expérimentale de l'agglomération turbulente induite par un champ acoustique
M. ASSA, D. BOULAUD et Y. METAYER	11	Dispositif de grossissement de particules ultrafines
M. DIOURI, D. BOULAUD, C. FRAMBOURT et G. MADELAINE	19	Nouveau spectromètre diffusionnel et inertiel (SDI 2000)
A. RANNOU, A. MOUDEN et G. TYMEN	27	Evaluation de l'exposition naturelle due à l'inhalation des aérosols radioactifs issus du radon à l'intérieur des locaux d'habitation
P. PINEAU, M. C. LATXAGUE, S. QABIL, P. FREOUR, J. F. TESSIER et J. G. FAUGERE	33	Etude par spectroscopie de vibration des particules atmosphériques
J. F. FABRIES et F. BARAT	41	Etude comparative des réponses d'un ensemble d'appareils de prélèvement utilisés en hygiène industrielle en fonction des paramètres de l'aérosol ambiant
B. MAHEU, G. GREHAN et G. GOUESBET	47	Diffusion de la lumière par une sphère dans le cas d'un faisceau d'extension finie—1. Théorie de Lorenz–Mie Généralisée: les coefficients g_n et leur calcul numérique
G. GREHAN, B. MAHEU et G. GOUESBET	55	Diffusion de la lumière par une sphère dans le cas d'un faisceau d'extension finie—2. Théorie de Lorenz–Mie Généralisée: application à la granulométrie optique
A. FROMENTIN, D. HASCHKE, R. TAUBENBERGER, W. SCHIKARSKI, W. SCHOECK, H. BUNZ, T. KANZLEITER, T. SCHROEDER, M. PEEHS, H. RUHMANN, M. FISCHER, G. WEBER et H. JAHN	65	DEMONA: étude du comportement d'aérosols dans un confinement
J. C. GUICHARD, A. ZERRARI et M. Y. JAFFRIN	73	Etude expérimentale du dépôt de particules fibreuses dans un modèle bronchique rigide
F. BLONDEL, G. KOUO-EDEME, D. RUDELLE and P. LAFARGUE	87	Contribution des particules à la toxicité des aérosols obtenus par thermolyse de divers matériaux

P. DESJONQUERES, A. BERLEMONT and G. GOUESBET — 99 — A Lagrangian approach for the prediction of particle dispersion in turbulent flows

M. THIOYE, J. N. LE TOULOUZAN, G. GOUESBET, P. GOUGEON et F. CHABOT — 105 — Réalisation d'échantillons pour l'étude de la diffusion de la lumière. Application à la calibration des granulomètres et densimètres

P. BISWAS and R. C. FLAGAN — 113 — The particle trap impactor

M. FICHMAN, C. GUTFINGER and D. PNUELI — 123 — A model for turbulent deposition of aerosols

B. T. CHEN, H. C. YEH and M. A. RIVERO — 137 — Use of two virtual impactors in series as an aerosol generator

H. C. YEH, R. L. CARPENTER and Y. S. CHENG — 147 — Electrostatic charge of aerosol particles from a fluidized bed aerosol generator

Technical Note
H. Y. WEN, G. KASPER and D. MONTGOMERY — 153 — Nucleation of trace amounts of condensible vapors in an expanding gas jet

157 — Book Review

i — Contents for *Journal of Aerosol Research, Japan*, Vol. 2, No. 3, Autumn 1987

NUMBER 2

S. G. JENNINGS — 159 — The mean free path in air

F. PRODI and F. TAMPIERI — 167 — Problems in the measurement of thermophoretic velocities of aerosol particles

B. DÄUMER, R. NIESSNER and D. KLOCKOW — 175 — Design and calibration of a low volume fog sampler

O. G. RAABE, D. A. BRAATEN, R. L. AXELBAUM, S. V. TEAGUE and T. A. CAHILL — 183 — Calibration studies of the DRUM impactor

E. M. KRUSHKAL and I. GALLILY — 197 — On the orientation distribution function of non-spherical aerosol particles in a general shear flow—II. The turbulent case

J. P. MITCHELL, P. A. COSTA and S. WATERS — 213 — An assessment of an Andersen Mark-II cascade impactor

J. C. BARRETT and C. F. CLEMENT — 223 — Growth rates for liquid drops

H. MASUDA and S. NAKASITA — 243 — Classification performance of a rectangular jet virtual impactor—effect of nozzle width ratio of collection nozzle to acceleration jet

M. ADACHI, K. OKUYAMA, Y. KOUSAKA and H. TANAKA — 253 Preparation of gas sensitive film by deposition of ultrafine tin dioxide particles

265 Conference Report

269 Announcement

i Contents for *Journal of Aerosol Research, Japan*, Vol. 2, No. 4, Winter 1987

NUMBER 3

271 Editorial

L. MONCHICK and R. BLACKMORE — 273 A variation calculation of the rate of evaporation of small droplets

R. V. TOMPSON and S. K. LOYALKA — 287 Condensation on a spherical droplet—III

N. P. VAUGHAN — 295 Construction and testing of an axial flow cyclone preseparator

A. D. EISNER and T. B. MARTONEN — 307 Properties of satellite and primary aerosols from a modified May spinning-top aerosol generator

M. S. HALL — 317 Calculation of the drag on a sphere with an attached dendrite

G. L. FINCH, J. A. MEWHINNEY, A. F. EIDSON, M. D. HOOVER and S. J. ROTHENBERG — 333 *In vitro* dissolution characteristics of beryllium oxide and beryllium metal aerosols

G. A. FERRON, B. HAIDER and W. G. KREYLING — 343 Inhalation of salt aerosol particles—I. Estimation of the temperature and relative humidity of the air in the human upper airways

S. J. DUNNETT and D. B. INGHAM — 365 The human head as a blunt aerosol sampler

K. TAKAHASHI, M. KASAHARA and K.-C. CHOI — 381 Source apportionment of particulate air pollutants in Japan

Technical Notes

D. B. INGHAM, P. J. HEGGS and M. L. HILDYARD — 385 A note on the pressure drop across a fibrous filter modelled as a symmetrical array of cylinders

A. WIEDENSOHLER — 387 An approximation of the bipolar charge distribution for particles in the submicron size range

391 Conference Report

395 Announcements

NUMBER 4

	397	Editorial
H.-C. WANG and W. JOHN	399	Dynamic contact charge transfer considering plastic deformation
J. R. BROCK, P. J. KUHN and D. ZEHAVI	413	Formation and growth of binary aerosol in a laminar coaxial jet
M. FICHMAN, C. GUTFINGER and D. PNUELI	425	Effect of particle loading on granular bed filtration—the cluster enhanced filter model
C. GUTFINGER, D. PNUELI and M. FICHMAN	443	Effect of particle loading on granular bed filtration—extension of the CEF model to polydisperse systems
P. L. DOUGLAS and S. ILIAS	451	On the deposition of aerosol particles on cylinders in turbulent cross flow
C. N. DAVIES	463	Cigarette smoke: generation and properties of the aerosol
A. H. BIERMANN and W. BERGMAN	471	Filter penetration measurements using a condensation nuclei counter and an aerosol photometer
TH. JUNG, H. BURTSCHER and A. SCHMIDT-OTT	485	Multiple charging of ultrafine aerosol particles by aerosol photoemission (APE)
R. NIESSNER, H. SCHRÖDER, W. ROBERS and K. L. KOMPA	491	Charging of particles with intense visible light pulses
Y. KOUSAKA, K. OKUYAMA, M. SHIMADA and K. OHSHIMA	501	A precise method to determine the diameter of airborne latex particles
L. DURAND-KEKLIKIAN and R. E. PARTCH	511	Microencapsulation of oil droplets by aerosol techniques—I. Metal oxide coatings
	523	Announcements
	i	Contents for *Journal of Aerosol Research, Japan*, Vol. 3, No. 1, Spring 1988

NUMBER 5

	527	Editorial
	529	Obituary Notice: Isaiah (Shaiah) Gallily (1925–1988)
J. ROSINSKI and G. M. MORGAN	531	Ice-forming nuclei in Transvaal, Republic of South Africa

J. ROSINSKI, P. L. HAAGENSON, C. T. NAGAMOTO, B. QUINTANA, F. PARUNGO and S. D. HOYT — 539 Ice-forming nuclei in air masses over the Gulf of Mexico

A. SCHMIDT-OTT — 553 New approaches to *in situ* characterization of ultrafine agglomerates

A. D. JONES, J. H. VINCENT, A. M. JOHNSTON and C. H. MCMILLAN — 565 Effects of electrostatic charge on the pulmonary deposition of mineral dust aerosols inhaled by rats

M. D. LOYE-PILOT and J. MORELLI — 577 Fluctuations of ionic composition of precipitations collected in Corsica related to changes in the origins of incoming aerosols

P. J. LIPOWICZ — 587 Determination of cigarette smoke particle density from mass and mobility measurements in a Millikan cell

H. BOCKHORN, F. FETTING, A. HEDDRICH, U. MEYER and G. WANNEMACHER — 591 Particle sizing of soot in flat pre-mixed hydrocarbon oxygen flames by light scattering

P. BISWAS — 603 Differential impaction of aerosols

G. A. FERRON, W. G. KREYLING and B. HAIDER — 611 Inhalation of salt aerosol particles—II. Growth and deposition in the human respiratory tract

Technical Notes

M. ROSATZIN and H. BURTSCHER — 633 Improved aerosol-photoemission sensor for detection of particulate emissions from combustions

S. SCHWYN, E. GARWIN and A. SCHMIDT-OTT — 639 Aerosol generation by spark discharge

643 Book Reviews

645 Announcement

NUMBER 6

647 Professor Isaiah Gallily

M. SHAPIRO, C. GUTFINGER and G. LAUFER — 651 Electrostatic mechanisms of aerosol collection by granular filters: a review

F. S. CAI and C. P. YU — 679 Inertial and interceptional deposition of spherical particles and fibers in a bifurcating airway

C. G. COLLIER, A. HODGSON, M. R. BAILEY and S. F. BARRY — 689 Factors affecting the clearance of fused aluminosilicate particles from the rat lung

W. D. GRIFFITHS 703 The shape selective sampling of fibrous aerosols

J. N. PRITCHARD, J. J. MCAUGHEY and A. BLACK 715 A technique for radio-labelling tar particulate material in mainstream cigarette smoke

G. N. LIPATOV, G. L. SHINGARYOV, S. A. GRINSHPUN and A. G. SUTUGIN 725 Aerosol sampling by an annular slot sampler with a smooth aspiration tube entrance

Y. YAMADA, Y.-S. CHENG and H.-C. YEH 733 Evaluation of coarse screens as diffusion cell material for ultrafine aerosols below 0.02 μm

Y.-S. CHENG, Y. YAMADA, H.-C. YEH and D. L. SWIFT 741 Diffusional deposition of ultrafine aerosols in a human nasal cast

R. JONAS and W. SCHÜTZ 753 Motion and deposition of particles in expanding and oscillating gas bubbles

Technical Note
Y. F. SU, G. J. NEWTON, Y. S. CHENG and H. C. YEH 767 Experimental measurements of the diffusion coefficients and calculated sizes of Pb-212 particles

771 Book Reviews

773 Thanks to Referees

NUMBER 7

Special Issue: Proceedings of the 1988 European Aerosol Conference

Editors' Preface 775

Smoluchowski Award: 1988 Recipient Dr Andreas Schmidt-Ott 777

Smoluchowski Award (GAeF) 779

Announcement 781

1. *Basic Aerosol Physics*
R. C. FLAGAN: Issues in aerosol dynamics 783

S. WALL and W. JOHN: Impact adhesion theory applied to measurements of particle kinetic energy loss 789

F. STRATMANN and H. FISSAN: Convection, diffusion and thermophoresis in cooled laminar tube flow 793

J. R. TURNER, H. J. FISSAN and D. K. LIGURAS: Particle deposition from plane stagnation flow: competition between electrostatic and thermophoretic effects 797

J.-S. Chang and S. Ono: Experimental simulation of field charging of ultrafine nonspherical particles 801

C. C. Wang, J.-R. Pao and J. W. Gentry: Calculations and measurements of the charge distribution for non-spherical particles 805

T. Cleary, J.-R. Pao, G. Mulholland and J. W. Gentry: Use of simulated fractals in the correlation of aerodynamic properties with structure for agglomerates 809

R. Strey and P. E. Wagner: Measurements of the heteromolecular homogeneous nucleation of partially miscible liquids 813

C. F. Clement and I. J. Ford: Aerosol formation in tube flow 817

K. Suzuki: Attachment coefficient of atmospheric ions to aerosol particles in transient state 821

M. Kulmala and Y. Viisanen: Nucleation in acid–water systems: experimental and theoretical results 825

R. Rambau and G. Schweiger: Numerical results on Raman scattering by spherical aerosol particles 829

D. L. Hutt: Measurement of the droplet size distribution of fog using multi-wavelength lidar: a feasibility study 833

H. Horvath: Experimental investigation on the validity of the Lambert–Beer law at high particle concentrations 837

I. Colbeck, L. Appleby, E. Hardman and R. M. Harrison: Studies of the optical properties and scavenging characteristics of smoke 841

W. Schneider, K. Anders and A. Frohn: Simulation of the behaviour of a multicomponent droplet in varying atmospheres 845

P. V. N. Nair: Growth of particles of mixed composition in the atmosphere as a function of relative humidity 849

G. Raimann and H. Horvath: Numerical simulations of slip correction 853

H.-G. Horn, H. Bonka, E. Gerhards, B. Hieronimus, M. Kalinowski, L. Kranz and M. Maqua: Collection efficiency of aerosol particles by raindrops 855

F. Nolting, C. Zetzsch, G. W. Israël and R. Böhm: Direct identification of sulphuric acid aerosol from the oxidation of SO_2 by ozone in the presence of hydrocarbon traces 859

O. Brandt and P. Roth: Measurements of the high temperature oxidation rate of soot particles 863

A. Wiedensohler and H. J. Fissan: Aerosol charging in high purity gases 867

J. KUKKONEN, T. VESALA and M. KULMALA: The evaporation of airborne droplets in a turbulent two-phase jet 871

C. F. CLEMENT: Water condensation on hygroscopic aerosols 875

Y. CHANG, R.-J. HAN, C. L. PEARSON, M. R. RUNYAN, M. B. RANADE and J. W. GENTRY: Applications of the log beta distribution to the evolution of aerosol growth 879

H. MÄTZING, H.-R. PAUR and H. BUNZ: Dynamics of particulate formation in the electron beam dry scrubbing process 883

M. BOTTLINGER and H. UMHAUER: Scattered light-particle size counting analysis: elimination of the influence of particle shape and structure 887

W. SCHNEIDER, E. KAUSCH, S. WITTIG and H.-J. FELD: The mean particle size in fresh undiluted cigarette smoke determined by means of the dispersion quotient method 895

2. *Instrumentation*

J. H. VINCENT: Aerosol sampling: the state of the art 899

W. HOLLÄNDER, D. BAKE, B. G. VAN ELZAKKER, L. LASKUS, A. VAN DER MEULEN, G. MORAWIETZ and K. H. ZIEROCK: A field intercomparison of various dust samplers with a reference sampler 903

S. J. DUNNETT and D. B. INGHAM: The behaviour of non-spherical particles near a cylindrical sampling head 907

E. W. HENNINGSON, I. FÄNGMARK, E. LARSSON and L.-E. WIKSTRÖM: Collection efficiency of liquid samplers for microbiological aerosols 911

K. R. SPURNY and J. SCHÖRMANN: Aerosol filter characterization by electron microscopical methods 915

R. MASER and R. JAENICKE: An instrument for monitoring the giant aerosol particles 919

M. HEINRICH: The free-air-impactor as a measuring device of the liquid water contents behind wet flue gas treatment 923

D. BOULAUD and M. DIOURI: A new inertial and diffusional device (SDI 2000) 927

U. BALTENSPERGER, H. W. GÄGGELER and D. T. JOST: The epiphaniometer, a new device for continuous aerosol monitoring 931

V. PRODI, F. BELOSI, M. FURRER and G. BETTAZZI: Characterisation techniques of simulated accident aerosols 935

C. ROTH and R. KÖBRICH: Production of hollow spheres 939

H. GNUSCHKE, K. MOLLENHAUER, G. ISRAEL and C. BECKMANN: A new dilution system for the purpose of measuring particulates in diesel engine exhaust gases 943

S. WANGWONGWATANA, P. V. SCARPINO and K. WILLEKE: Liquid-to-air transmission of aerosols from a bubbling liquid surface 947

B. SACHWEH and H. BÜTTNER: Measuring droplet sizes with an optical particle counter: aerodynamic calibration and extension of the measuring range to smaller sizes 953

J. MÄKYNEN: Optical particle counters: optimization of response functions 957

P.-E. BENGTSSON and M. ALDÉN: Soot particle measurements in premixed ethylene flames using a pulsed laser method 959

U. WESTBLOM and M. ALDÉN: Spatially resolved flow velocity measurements using laser-induced fluorescence from a pulsed laser 963

W. MÖLLER, W. STAHLHOFEN and C. ROTH: Preparation of spherical magnetic aerosols for long time clearance and relaxation studies of the human lungs 967

E. KARG, F. ERBE, G. A. FERRON, B. HAIDER, J. HEYDER, W. G. KREYLING, J. PETER, TH. TUCH and W. WITTE: Facilities for chronic exposure of dogs to sulfite aerosols 971

P. M. MELTON and R. M. HARRISON: Critical evaluation of a wind tunnel and particle sizing system for use in aerosol generation and deposition studies 975

V. PRODI and F. BELOSI: Particle separation in a shallow channel inertial spectrometer 979

H. REGTUIT, E. VRINS and P. HOFSCHREUDER: The tunnel impactor: a multiple inertial impactor for coarse particles 983

C. J. DE RUITER, F. OESEBURG and F. M. BENSCHOP: The tunnel impactor: calibration with copper sulphate aerosol under atmospheric conditions 987

E. R. WHITBY and N. L. WHITBY: DISTFIT: an aerosol scientist's computer tool 991

T. SCHUMANN, H. GYSI and S. KAELIN: Coating of impaction surfaces of cascade impactors: necessary for sampling ambient aerosols in rural and suburban areas? 993

S. J. DUNNETT: The effects of rebound upon the sampling efficiency of a thin-walled sampler 997

C. BECKMANN, G. ISRAEL, K. MOLLENHAUER and H. GNUSCHKE: Investigation of diesel particle characteristic during sampling and conditioning 1001

T. M. MERRIFIELD and J. M. DUDOK VAN HEEL: Commercial U.S. PM_{10} instruments 1005

K. D. HORTON, J. P. MITCHELL and A. L. NICHOLS: The characterisation of sub-micron aerosols using electrical mobility analysers: an experimental assessment 1009

M. R. Stolzenburg, W. T. McDermott and A. Schwarz: Performance studies of ultrahigh efficiency membrane filters using a 3.5 nm particle detector 1015

A. Jerkovic and H. J. Fissan: Monitor for size distribution parameters and number concentration of product aerosols 1019

L. Asking, B. G. Martinsson and H.-C. Hansson: An electrostatic aerosol sampler 1023

G. I. Johansson, K. R. Akselsson, P. Eklund, H.-C. Hansson and G. Jönsson: A new technique for the determination of activity distributions of radon daughters 1027

N. E. G. Lövestam, J. Pallon and H.-C. Hansson: Proton microprobe PIXE-analyses of single aerosol particles 1031

A. Hautojärvi, T. Raunemaa and P. Pasanen: A novel method for the deposition analysis in tube flow 1037

J. W. Gentry, K. R. Spurny, S. A. Soulen and J. Schörmann: Measurements of the diffusion coefficients of ultrathin asbestos fibers 1041

V. Dreiling and R. Jaenicke: Aircraft measurement with condensation nuclei counter and optical particle counter 1045

M. Kriews, K. Naumann and W. Dannecker: Aerosol specification in the southern North Sea region by wind dependent sampling and multielement analysis 1051

W. Winiwarter: A procedure for calculating the sampling efficiency in annular denuders 1055

G. N. Lipatov, S. A. Grinshpun and T. I. Semenyuk: Deposition of aerosol particles in horizontal and inclined sampling tubes (experimental data) 1059

S. A. Grinshpun, G. N. Lipatov, T. I. Semenyuk and A. G. Sutugin: The influence of secondary aspiration process on sampling efficiency of thin-walled aerosol probes (experiments and analysis) 1061

3. *Inhaled Particles*

J. Heyder: Examining the human lung with aerosols 1063

Ch. F. Schiller-Scotland, J. Gebhart, H. Lintl, G. Rudolf, G. Scheuch and R. Siekmeier: Human airway diameters derived from aerosol inhalation studies—reproducibility of data 1067

W. G. Kreyling, M. Neuner and E. Matejkova: Analysis of intraphagolysosomal dissolution of test particles in canine alveolar macrophages 1071

A. Johansson, T. Curstedt, C. Jarstrand, B. Robertson and P. Camner: Effects on the rabbit lung of combined exposure to nickel and trivalent chromium 1075

W. Nixon, M. J. Egan and N. I. Robinson: Modelling study of the influence of the cardiogenic pulse upon deposition of inhaled aerosol 1079

G. A. Ferron and J. Gebhart: Estimation of the lung deposition of aerosol particles produced with medical nebulizers 1083

W. Stahlhofen and W. Möller: Description of a biomagnetic method for detection of the behavior of magnetic aerosols in the human lungs 1087

E. Berg, K. Bäckström, M. Dahlbäck and O. Nerbrink: Output and particle size distribution of Pulmicort suspension generated from MAD2 and PariBoy jet nebulizers 1093

K. Bäckström and P.-G. Nilsson: Measurements of droplet size distributions from metered dose inhalers with different vapour pressures and contents of surfactant 1097

E. Berg, K. Björnek and C. Widerström: Pulmicort® suspension for nebulizing tested with different jet nebulizers 1101

J. Gebhart, G. Scheuch, P. Gehr, M. Geiser, J. Heyder and V. Im Hof: Individual aerosol exposure unit for small rodents using photometry 1105

B. Olsson, H. Jaegfeldt, K. Hed and H. Lundbäck: Correlation between laser scattering and inertial impaction for the particle size distribution characterization of Bricanyl® Turbuhaler® 1109

J. J. McAughey, J. N. Pritchard and A. Black: Particle deposition under non-ideal conditions 1113

J. N. Pritchard, J. J. McAughey and A. Black: The regional deposition of tar from cigarette smoke in the rodent respiratory tract 1117

M. Anderson, M. Svartengren, K. Philipson and P. Camner: Regional human lung deposition studied by repeated investigations 1121

B. Rudell, B. Kolmodin-Hedman, U. Hammarström, B.-I. Wenngren and A. Nilsson-Granström: Dizziness and oculomotor dysfunction after welding 1125

N. H. Seemayer, H. Behrendt, E. Maly und K. Hübner: The role of quartz- and coal mine dust induced mediators from human macrophages in pathogenesis of silicosis 1129

G. Gercken, M. Labedzka, R. Geertz and H. Gulyas: Influence of heavy metals and mineral dusts on superoxide anion release by alveolar macrophages 1133

K. Nyberg, A. Johansson, U. Johansson and P. Camner: Studies of intraphagolysosomal pH in alveolar macrophages 1137

G. Gercken, H. Kahlert and H. Gulyas: Mineral dust-induced release of platelet activating factor (PAF) by alveolar macrophages 1141

G. Scheuch, J. Gebhart, T. Heibel, E. Heiker, J. Heyder, H. Kronenberger, H. Lintl, J. Meier-Sydow and W. Stahlhofen: Effect of fenoterol-induced bronchodilation on aerosol derived bronchial airway diameters 1145

S. TAKENAKA, H. MUHLE, B. BELLMANN, O. CREUTZENBERG and U. MOHR: Morphological effects of nickel powders on the lung of Syrian golden hamsters 1149

B. RUDELL, K. R. AKSELSSON and M. H. BERLIN: Growth of welding aerosol particles in high relative humidity and particle deposition in the human respiratory airways 1153

E. DROSSELMEYER, V. HOFHEINZ, S. PÄTZOLD, G. POLZER, J. SCHIMMELPFENG and A. SEIDEL: Parameters influencing the effects of quartz on alveolar macrophages 1157

4. *Atmospheric Aerosols*

J. MÜLLER: Chemical structure of aerosols 1161

U. C. MISHRA: Studies on aerosol size distribution and composition 1165

M. SCHULZ, M. STEIGER, M. SCHWIKOWSKI, M. KRIEWS, K. NAUMANN and W. DANNECKER: Variability of ambient trace element concentrations at the North Sea with respect to air mass history 1171

E. SWIETLICKI, B. SVANTESSON and H.-C. HANSSON: European source area apportionment 1175

G. METZIG: Extinction coefficient measurements of tropospheric aerosols 1179

D. A. BRAATEN, K. T. PAW U and R. H. SHAW: Coherent turbulent structures and particle detachment in boundary layer flows 1183

S. E. LINDBERG, G. M. LOVETT, D. A. SCHAEFER and M. BREDEMEIER: Dry deposition velocities and surface-to-canopy scaling factors for aerosol calcium from forest canopy throughfall 1187

S. LANG, T. RAUNEMAA, M. KULMALA and M. RAUHAMAA: Latitudinal and longitudinal distribution of the Chernobyl fallout in Finland and deposition characteristics 1191

A. D. CLARKE: Aerosol physical chemistry in remote marine regions 1195

G. LAMMEL and D. PERNER: The atmospheric aerosol as a source of nitrous acid in the polluted atmosphere 1199

C. ZETZSCH, G. PFAHLER and W. BEHNKE: Heterogeneous formation of chlorine atoms from NaCl in a photosmog system 1203

V. K. SAXENA and R. J.-Y. YEH: Temporal variability in cloud water acidity: physico-chemical characteristics of atmospheric aerosols and windfield 1207

J. PODZIMEK, H. ANDRIAMBELOMA, A. DE MAIO, M. IANNIRUBERTO, R. MONTMORY, E. SANSONE, G. SPEZIE and G. STOWELL: Aerosol evolution and metamorphosis during and after haze (fog) formation over the Bay of Naples 1211

B. G. MARTINSSON and H.-C. HANSSON: Chemical characterization of atmospheric aerosol samples using ion beam techniques 1215

L. Holmlid and S. Wall: Atmospheric surface ionization of alkali salt aerosols: particles of inorganic salts and of a micelle forming salt 1219

P. Paatero, T. Raunemaa and R. L. Dod: Composition characteristics of carbonaceous particle samples, analyzed by EVE deconvolution method 1223

R. Pani, J. Hertz and P. Bucher: Small scale regional differences and altitude dependence of the composition of airborne particulate matter 1227

R. M. Hitzenberger: On the wavelength dependence of the extinction coefficient of the atmospheric aerosol at different locations and under various meteorological conditions 1231

H. Jäger, W. Carnuth and B. Georgi: Observations of Saharan dust at a north alpine mountain station 1235

J. Förster and R. Herrmann: Meteorological influences on the chemical characteristics of atmospheric aerosols in the Fichtelgebirge (N Bavaria) 1239

A. Jäppinen, T. Pakkanen, P. Keronen, M. Kulmala, R. Hillamo and Y. Viisanen: Wintertime concentrations of acid aerosols in Lapland 1243

B. Hietel and J. Tschiersch: Multielement analysis by PIXE of size fractionated aerosol samples at various atmospheric transport conditions 1247

K. H. Reinhardt and D. Wodarg: Transport of selected organochlorine compounds over the sea 1251

R. Hillamo, J. M. Pacyna and A. Bartonova: Characterization of aerosols during long-range transport episodes of air pollution to Norway 1257

C. Boni, E. Caruso, E. Cereda, G. M. Marcazzan, P. Redaelli and P. Bacci: Simultaneous PIXE and PIGE analyses of aerosol samples collected in urban areas 1263

P. Bacci, M. Del Monte, S. Cernuschi, M. Giugliano, P. Redaelli, G. Ravasini, A. Rolla, C. Sabbioni and A. Ventura: Aerosol emissions from combustion sources in urban and industrialized areas 1267

C. Boni, E. Caruso, E. Cereda, G. Lombardo, G. M. Braga Marcazzan and P. Redaelli: Particulate matter elemental characterization in urban areas: pollution and source identification 1271

B. Georgi, W. J. Müller and K.-P. Giesen: History of a smog situation in Hannover 1275

K. Kemp: Source apportionment for mutagens in urban aerosols by means of an oblique factor model 1279

A. Fromentin: Particle resuspension study: results of an array-photometer 1283

W. Van Borm, T. Keersmaekers and F. Adams: Characteristics of resuspended soil particles with high concentrations of Cu, Zn, Cd and Pb as a function of particle size 1287

P. E. Toro: An analysis of the settling velocities for sulphate particulate in Santiago (Chile) 1291

M. Kriews, W. Dannecker, K. Naumann and U. Wätjen: On the preparation of an ambient aerosol reference material for elemental analysis 1295

H. Marfels, K. R. Spurny, J. Iburg, A. Wenzel, U. Fritsche, J. König and E. Balfanz: On the measurement of toxic and carcinogenic aerosols in ambient air 1299

T. A. Pakkanen and R. E. Hillamo: Analysis of low metal concentrations from atmospheric aerosol samples collected with a multi-stage impactor 1303

J. Marijnissen, B. Scarlett and P. Verheijen: Proposed on-line aerosol analysis combining size determination, laser-induced fragmentation and time-of-flight mass spectroscopy 1307

M. Schwikowski, K. Naumann and W. Dannecker: Determination of nitric acid and particulate nitrate in the marine atmosphere employing a diffusion denuder and a filter pack 1311

H. Dreiheller, N. Trost and H. Wendt: Solutions for radiometric dust concentration measurements 1315

A.-R. A. Ahmed: Studies on Aitken nuclei in the atmosphere 1319

5. *Nuclear Aerosols*

P. K. Hopke and M. Ramamurthi: Production of ultrafine particles by radon radiolysis 1323

J. C. Strong: The size of attached and unattached radon daughters in room air 1327

A. Reineking and J. Porstendörfer: Activity size distributions of the shortlived radon decay products and their influence on the deposition probability in the human lung 1331

R. Falk, J. Suomela and A. Kerekes: A study of "hot particles" collected in Sweden one year after the Chernobyl accident 1339

K. Kugeler, Ch. Epping and J. Roes: Aerosol formation during air ingress into the core of a pebble high temperature reactor 1343

J. Jokiniemi: The growth of hygroscopic particles in a containment vessel 1347

R. Jonas, G. Schwientek and W. Schütz: Consideration of turbulent deposition in aerosol behaviour modelling with the CONTAIN code and comparison of the computations with the FAUNA 2 sodium fire experiment 1351

D. Seehars, D. Hochrainer and M. Spiekermann: Experimental determination of the release of radioactive powders after downfall of waste containers under worst case conditions 1355

M. KULMALA, T. RAUNEMAA, M. MECKE, H. SAARI, P. KERONEN and E. ISSAKAINEN: Indoor surface accumulation of radioactive particles after Chernobyl fallout 1359

S. LUOKKANEN, M. KULMALA and T. RAUNEMAA: Chernobyl fallout in Finland: hot areas 1363

F. RAES and B. GEORGI: Aerosol measurements and nuclear accidents: a reconsideration 1367

6. *Industrial Applications*

D. MAATMAN, W. GRUISINGA, P. V. LAMBECK and TH. J. A. POPMA: Production of thin luminescent films by chemical aerosol deposition technology (CADT) 1369

A. BACKHAUS, M. CONRADS, D. WURZ and M. ZIMMERMANN: Development of a new agglomerator for the elimination of flue gas aerosol 1373

J. MAGILL, S. PICKERING, S. FOURCAUDOT, J. A. GALLEGO-JUAREZ, E. RIERA-FRANCO DE SARABIA and G. RODRIGUEZ-CORRAL: Ultrasonic aerosol agglomeration at low mass loadings 1377

H. STEINER, FR.-W. BACH, D. WINDELBERG and B. GEORGI: Aerosol generation during cutting of various materials with plasma, laser and consumable electrode 1381

E. VRINS, P. HOFSCHREUDER and F. OESEBURG: A field study on the dust emission by coal dumping from a conveyor 1385

L. LINDAU: FILTRA-MVSS, a system for reactor accidents mitigation 1389

V. PRODI, F. BELOSI, R. CAPONETTI, C. DAMIANI and C. ORI: Particles from a sodium–water reaction: size characterisation and scrubbing efficiency measurements 1393

H.-R. PAUR, S. JORDAN and W. BAUMANN: Removal of the aerosol formed in the electron beam dry scrubbing process by bag filters 1397

J. MÄKELÄ, A. LAAKSONEN, R. SALMI and T. RAUNEMAA: Experiments on combustion flue gas cleaning with electron beam 1401

7. *Clean Room Aerosols*

T. H. KUEHN: Predicting air flow patterns and particle contamination in clean rooms 1405

T. W. PETERSON, K. M. SANNES, F. STRATMANN and H. FISSAN: Particle deposition on wafers: a comparison between two modeling approaches 1409

F. BELOSI, C. TOSI and V. PRODI: Calculation of surface contamination by particle transport in a numerically modeled flow field 1413

T. NIIDA, H. Y. WEN, R. UDISCHAS and G. KASPER: Counting efficiency of condensation nuclei counters in N_2, Ar, CO_2 and He 1417

W. SCHMITZ and H. FISSAN: Error analysis of penetration ratio measurements of ULPA filters 1421

J. Ho, B. Kournikakis, A. Gunning and J. Fildes: Submicron aerosol characterization of water by a differential mobility particle sizer 1425

8. *Industrial Hygiene*

H. P. König, W. Koch, L. Neder and R. F. Hertel: Characterisation of nickel alloy aerosols generated from grinding processes 1429

E. Lehmann and N. Fröhlich: Particle size distribution of wood dust at the workplace 1433

P. Vinzents: Personal sampling of total and inspirable dust. Results from a survey in the Danish wood- and furniture industry 1437

M. Bohgard, H. Welinder and K. R. Akselsson: Aerosols from thermal spraying operations with materials containing chromium and nickel 1441

J. Ruuskanen, C.-C. Chen, D. R. Carpenter, A. Sherman and K. Willeke: Aerosol penetration characteristics for disposable respirator facepieces 1445

G. J. Praml and A. L. Hartmann: Personal full shift fine dust registration: a handy measuring system for field application 1449

W. Koch, H. Lödding, W. Dunkhorst and H. Scheffel: A measuring system with combined size and time resolution capability for the characterization of dust in the working place environment. Development of a prototype instrument 1453

A. Gudmundsson, M. Bohgard and H.-C. Hansson: Multi-jet impactor with 50 micrometer diameter nozzles for uniform deposition of submicron particles 1457

W. D. Griffiths: Evaluation of samplers for airborne agricultural dusts 1461

A. Gudmundsson and M. Bohgard: Determination of sampling characteristics of personal samplers 1465

K. Y. K. Chung and R. F. J. Moss: A survey of industrial floor sweeping machines 1467

INHALED PARTICLES VI

The Proceedings of the British Occupational Hygiene Society
6th International Symposium, Cambridge, UK
and including the 2nd International Workshop on
Lung Dosimetry

Edited by: **J DODGSON,** *Institute of Occupational Medicine, Edinburgh, UK,*
R I McCALLUM, *University of Newcastle upon Tyne, UK,*
M R BAILEY, *National Radiological Protection Board, Chilton, UK*
D R FISHER, *Health Physics Department, Pacific Northwest Laboratory, Washington, DC, USA*

This book analyzes the effects of various particle substances on the respiratory tract, including chemical, mineral and coal dust and radioactive particles. Diseases linked or caused by inhalation of these particles are discussed, together with risk assessments of various occupations and a study of safety standards for people working in risk areas.

For anyone working in respiratory medicine, industrial medicine and industrial health and safety.

CONTENTS:
Deposition of inhaled particles. Deposition and clearance of inhaled particles. Clearance of inhaled particles. Hazard parameters. Biological reactions to dust I. Dust measurement. Biological reactions to dust II. Lung analysis I. Epidemiological studies I. Lung analysis II. Epidemiological studies II. Man-made mineral fibres. Coal I. Coal II. Silicosis. Organic dusts. Diesel fumes. Magnetopneumography. Assessment of lung doses. Deposition and clearance of inhaled particles. Lung dosimetry I. Lung dosimetry II. Effects of inhaled radioactive particles.

To be published as a 1988 supplement to *The Annals of Occupational Hygiene.*

229x153 mm 1142 pp (approx.) 3500 lit refs (approx.) 500 illus (approx.)
0 08 0341853 Hardcover To be published in December 1988 US$215.00

US Dollar prices quoted are valid for all countries except Australia, Austria, Germany (BRD), New Zealand, UK and Eire. (Prices for these countries are available from the appropriate Pergamon office.)
Prices and proposed publication dates are subject to change without prior notice.

JOURNAL OF AEROSOL SCIENCE

In association with the Gesellschaft für Aerosolforschung (GAeF)
Association for Aerosol Research

Aims and Scope

The aim of the Journal is to encourage the submission of original, well-documented papers on all aspects of aerosol research. Areas covered include:

Basic and applied aerosol formation, processes and reactions; chemistry; mechanics; optics; electrostatics; analysis; electromagnetic, acoustic and nuclear radiations; diffusion processes; mobility; condensation and evaporation; heat motion; energy distribution; forces of attraction and repulsion; turbulence; coagulation; deposition; biological action; inhalation; nucleation; microscopy and electron microscopy; instrumentation.

Papers will be subjected to constructive criticism by identified referees who will discuss them with authors as far as is required.

The Journal will publish research work and occasional reviews of recent work of basic scientific value. The intention is also to encourage the presentation of results in forms which can be generalized as far as possible, rather than the restricted presentation of most applied research.

Notes for Contributors

1. Manuscripts intended for publication in the Journal should be submitted to one of the members of the Editorial Board, whose names and addresses are printed on the inside front cover of the Journal.
2. Authors are requested to submit 3 typed manuscripts in *double spacing* (1 original plus 2 copies). The text must be ready for printing as substantial changes at proof stage are unacceptable. An abbreviated version of the paper's title should be supplied by the author for the running heads. Please note that the original manuscript and diagrams will be discarded one month after publication unless the Publisher is requested to return original material to the author, on submission of the manuscript.
3. Any Greek letters, or special symbols likely to be unfamiliar to the printer, should be identified in the margin the first time they occur on each page of the manuscript.
4. The paper should commence with an abstract of up to about 150 words.
5. Illustrations should not be inserted in the pages of the manuscript but should accompany the manuscript on separate sheets. However, the position of figures and tables in the text should be indicated where desired. The captions for both figures and tables should be typed on a separate page at the end of the manuscript and not included in the text or under the illustrations. Illustrations should not be larger than A4 or 20 × 30 cm. Half-tone illustrations should be kept to a *minimum*. As printing colour half-tones is extremely expensive, it is our policy to ask authors, or their institutions, to bear the cost of the preparation of the colour separations, with Pergamon bearing the cost of the extra printing. Black and white half-tones are reproduced at no additional cost. Line drawings should be drawn clearly, in indian ink if possible and about double the intended size. Lines should be thick enough to be clear when the illustration is reduced to a size suitable for inclusion in the Journal. Lettering should either be stencilled in indian ink, or added by dry-transfer lettering again large enough for the necessary reduction. Tables also should be suitable for direct reproduction. For guidance as how best to prepare figures and tables please consult the photoreprographic department of your institution.
6. References to literature in the text should be quoted in the form Jones (1950), or Jones *et al.* (1950) if there are three or more authors. The list of references should be given at the end of the text in alphabetical order (author's surname first). The title of the journal should be abbreviated as in *World List of Scientific Periodicals* (4th edition). Examples are:

   Frisby, C. B. (1954) *Industrial Medicine and Hygiene* (Edited by Merewether, A.) Vol. II, p. 16. Butterworths, London.

   Harris, C. M. (Editor) (1957) *Handbook of Noise Control.* McGraw-Hill, New York.

   Davies, C. N. (1970) The clogging of fibrous aerosol filters. *J. Aerosol Sci.* **1**, 35–39.

   B.S. 2980 (1958) *British Standard for Pure Tone Audiometers.* British Standards Institution, London.
7. Authors who wish to submit Technical Notes as camera-ready copy should refer to the information at the back of the *Journal of Aerosol Science* Volume 18, No. 2 (1987) or write to the Editor-in-Chief for the guidelines for preparing camera-ready copy.
8. A reprint order form will be sent out with proofs so that authors may order reprints at a reasonable price.
9. Proofs will be sent to the first-named author for correction, unless otherwise specified, and he should ensure these are restricted to printer's errors; any other substantial corrections will be charged to the author.
